

Technology Brief

EZ Boat-Loading System

US Patent
6,904,861

OVERVIEW

This technology provides a system to capture and arrest a marine vessel coming onto a trailer from open water.

POTENTIAL USES

The system could be added to new boat trailers or sold as an after market item for the military, recreational and small to medium size commercial boat markets.

ADVANTAGES

- Simplifies boat loading
- Reduces time for boat loading
- Reduces damage during loading
- Improves loading in difficult conditions:
 - ✓Rough water
 - ✓High current
 - ✓Heavy boat traffic

DEVELOPMENT STATUS/OPPORTUNITY

The technology was developed by the US Navy.
Several prototypes are in use by the Navy.
A computer model is available to create custom designs.
A US patent has been issued for the technology.
Partners are sought for licensing, development & commercialization.
